WINTER WATERING TIPS

- Choose a warm day with air temperature above 40 degrees Fahrenheit.
- Ensure that the soil is not frozen.
- Water for short periods, allowing water to soak in before re-applying.
- Water at mid-day so that water can soak in before it freezes at night.
- Newly planted lawns, trees, shrubs and flowers require the most attention in winter gardening along with established turf and trees located in sunny, windy or exposed areas.
- **REMEMBER:** Remove the hose from the spigot after watering. Leaving the hose attached can cause water to freeze in your pipes, resulting in expensive damage.
